Loa, at a time when the light at the summit was unusually brilliant. He found the fountain playing, he says, to a height of 200 to 500 feet, and assuming all the forms of a grand fountain of water. 1875, January. --Mr W. L Green mentions the occurrence of summit action at this time for a month, in his tabular statement of eruptions, and says nothing of one in August of this year, to which date Mr. Coan refers the 1875 eruption. The report of the Challenger sustains Mr. Coans statement, but does not positively set aside that of Mr. Green. 1875, August. --Mr. Coan says: f I think it was on the 11th of August that the summit crater was again in brilliant action. The action continued, as appeared in the view from Hilo, for one week, and without any observed evidence...
