John Wiley & Sons Inc. Paperback. Book Condition: new. BRAND NEW, 2050: Designing Our Tomorrow, Chris Luebkeman, Envisioning a positive future through design 2050: Designing Our Tomorrow describes the ways in which architecture and design can engage with the key drivers of change and provide affirmative aspirations for a not-so distant future. With a focal date of 2050, this issue of AD asks when and how the design community can, should, and must be taking action. The discussion centres on shifts in the urban environment and an established way of life in a world of depleted natural resources and climate change. Featuring interviews with Paola Antonelli of MoMA and Tim Brown of IDEO, it includes contributions from thought leaders, such as Janine Benyus, Thomas Fisher, Daniel Kraft, Alex McDowell, Franz Oswold, and Mark Watts. High-profile designers like FutureCitiesLab, SHoP, and UrbanThinkTank, are featured as examples of forward thinking and innovation in the field, highlighting the need for - and possibility of - a shift in the global perspective. The discussion includes the challenges we face in creating a positive tomorrow, and the solutions that architecture and design can bring to the table. Despite the proliferation of global crises possibly threatening human survival, our current moment provides the opportunity to write a new, positive story about our future. 2050: Designing Our Tomorrow describes how the design community can contribute to that vision by asserting positive aspirations for the worlds we create ourselves. * See how architects and designers inspire global positive change * Consider architecture's role in shaping cultural outlook * Learn the key drivers of change for the built environment * Explore the perspectives of leading experts and designers Architects and planners over the centuries have put a stamp upon the planet through the physical manifestations of their belief structures....
