Reviews

Unquestionably, this is actually the greatest function by any writer. We have go through and so i am confident that i am going to gonna read through once more once again later on. I am just happy to explain how this is actually the very best book i have got go through during my individual existence and might be he greatest ebook for ever.

Praeger. Hardcover. Book Condition: New. Hardcover. 150 pages. Dimensions: 11.8in. x 5.4in. x 0.6in. Imagine what an extra-terrestrial Weather Channel would be like, with a professional space weatherman as your forecaster, and you get rather close to the astounding aspects of nature described in John Freemans *Storms in Space*. Known only to a handful of space scientists, yet capable of disrupting technical systems as extensive as communication satellites and electric power grids *Storms in Space* is the first book to unveil the unseen elements of outer space. Opening with a series of vignettes (describing how the Northern and Southern lights the aurora are a visible manifestation of space storms, or how satellites serve as weather stations in space), Freeman provides visual analogies to help illustrate the effects of a storm in space on people. These vignettes explore the chain of events that lead to the storm and to connect the facets of the storm with the scenes in the vignettes. Freeman details the state of the art in forecasting space storms, the models that are used, and the prospects for their future improvement. He also describes the hazards of space storms for human technological systems including human space flight. *Storms in Space* provides both a new understanding and appreciation of how seemingly insignificant disturbances out there can have major effects right here. John W. Freeman is Professor Emeritus and Research Professor of Physics and Astronomy at Rice University. Over the past 35 years he has directed a number of satellite instrumentation projects, including the Apollo 12, 14, and 15 projects for which he was awarded the NASA Medal for Exceptional Scientific Achievement (1973). He has also served as Editor-in-Chief of *Space Power*. Freeman is currently working to develop a model that will forecast the intensity of the Van Allen Radiation Belts...
