Reviews

This publication is very gripping and interesting. We have go through and so i am confident that i am going to planning to read through yet again again in the foreseeable future. You are going to like how the blogger write this ebook.

(Dr. Thaddeus Turner PhD)

American Mathematical Society, 1997. Hardcover. Book Condition: New. Brand new. We distribute directly for the publisher. Clean, unmarked pages. Hardcover. This is a two-part volume reflecting the proceedings of the 1993 Georgia International Topology Conference held at the University of Georgia during the month of August. The texts include research and expository articles and problem sets. The conference covered a wide variety of topics in geometric topology. Features: * Kirby's problem list, which contains a thorough description of the progress made on each of the problems and includes a very complete bibliography, makes the work useful for specialists and non-specialists who want to learn about the progress made in many areas of topology. This list may serve as a reference work for decades to come. * Gabai's problem list, which focuses on foliations and laminations of 3-manifolds, collects for the first time in one paper definitions, results, and problems that may serve as a defining source in the subject area. Titles in this series are co-published with International Press, Cambridge, MA. Readership Graduate students, research mathematicians, and physicists interested in manifolds and cell complexes. Reviews "This is an extremely useful piece of work and the whole community can be very grateful that Kirby has taken on such an enormous task." -- Mathematical Reviews, Review of Part 2 Table of Contents Part 1 * J. H. Rubinstein -- Polyhedral minimal surfaces, Heegaard splittings and decision problems for 3-dimensional manifolds * D. Auckly -- Surgery numbers of 3-manifolds: a hyperbolic example * M. Eudave-Muñoz -- Non-hyperbolic manifolds obtained by Dehn surgery on hyperbolic knots * S. Boyer and X. Zhang -- Cyclic surgery and boundary slopes * J. Luecke and Y.-Q. Wu -- Relative Euler number and finite covers of graph manifolds * M. Ouyang -- Geometric invariants for 3-manifolds * N. Habegger -- Link homotopy in simply connected 3-manifolds *...
